AMMENDED ANNUAL ROAD REPORT

1. Road and culvert or bridge degradation: See attachment "A" Road Condition Report
2. Amount of money necessary for maintenance of the precinct roads during the next fiscal year: Road and Bridge FY 2020 Budget (\$2,628,750.79)
3. Number of traffic control devices in the precinct defaced or torn down. 475

Submitted by the undersigned on this 16 day of March 2020

Road and Bridge Administrator: [Signature]

Subscribed and sworn to, before me, the undersigned authority, this 16 day of March

[Signature]
Notary Public

KRISTIN CULBERTSON
My commission expires: 11/18/2023

ATTACHMENT "A"
ROAD CONDITION REPORT

SURFACE TYPE

Asphalt: Paved surface, typically chip and seal, hot mix, or oil dirt

Rock: Aggregate, native pit run or a combination

Dirt: Unimproved may or may not have been bladed

Other: Primarily used to identify roads that have a combination of asphalt, rock and/or dirt.

RATING
(Condition)

All roads were divided into two categories, paved and unpaved.

Paved were assigned the following categories:

- (0). Closed or nonexistent
- (1). Pavement disintegrated, no value, needs complete rebuild.
- (2). Visible defects including severe cracking, distortion, and rutting. Some portions of the pavement missing.
- (3). Visible defects including moderate cracking, some patching present.
- (4). Relatively new surface showing slight signs of wear.
- (5). New or near new pavement, free of cracks, patches, or rutting.

Unpaved were assigned the following categories:

- (0). Closed or nonexistent.
- (1). No improvements, typically with grass growing in road bed.
- (2). Improved base, disintegrated or non-existent.

- (3). Pit run or sandstone base, blade finished.
- (4). Sand stone or limestone base relatively new rebuild, showing slight signs of wear.
- (5). Limestone base recently completed, roller finished, smooth surface.

DEGRADATION

All ratings were given an additional value where appropriate. The number assignment followed by an "a (o/t)" value represents the presence of Oil Field Traffic and the causation of any degradation. An example would be if a road has a value of 2(poor) and it can be determined that the condition was caused by oil field traffic the value would then be a 2(poor-o/t).
